

MADE IN USA | SINCE 1972

Manufacturers of "The Original Monster Stacks." Since 1972, Dynaflex Products has focused on innovative, performance oriented designs that set the standard for quality & functionality. We are proud to bring the heavy duty truck industry it's first line of air intake performance products. Made to run hard or to show off, these chrome plated air intake kits continue to "keep it simple" with one part number that provides complete bills of materials for specific make, model, and engine applications.

*PATENTED AK LITE CHROME EXHAUST KITS*

## LOOK FOR DP

Consistency you can count on. We've been supplying chrome plated exhaust parts for 45+ years. To complete this project, engineering drew more than just insight from all that time to bring you these intake systems. You'll notice that some of the parts on the side of your truck mounting our exhaust might be under your hood now, too!

## CHROME IS WHERE THE HEART IS

Polished aluminum is cool and so is polished stainless, but nothing compares to chrome plated materials. Whether aluminum, stainless steel or anything else, you'll find it plated to perfection in these brand new air intake kits.

## UNDERCOVER KITS

If trying to take your engine to the next level, start with the only air intake kits for heavy duty trucks. Chrome plated pipework, branded silicone products and cleaner clamping technology make these new underhood kits the quickest and shiniest option for replacing ugly factory intake pipes.

## CUSTOM COBRA HEAD

One of the more custom upgrades featured in all the air intake kits are the gloss black "cobra heads" that mounts from your intake elbow to the backside of the turbo. Factory trucks run a ribbed, matte black rubber elbow that would look out of place next to all the new gloss black boots.

## GETTING HEATED

On the hot side of the system we feature nomex reinforced silicone boots that are good to 500°F to avoid any blow outs and down time. Factory versions are orange, you'll notice we color matched the outside gloss black while keeping the thermal protection on the interior.

## DYNAFLEX PRODUCTS

The patented Air Kooled Lite Series (AK) combines more than 45 years of experience constructing the highest quality exhaust systems for trucks. Utilizing modern processes and materials, we are proud to bring you the most technologically advanced truck exhaust product offering, ever. Combining our patented technology with a dedication to no drilling, no fabricating - bolt on Kits - we are excited to release some long overdue aftermarket options for trucks with exhaust temperature profiles outside of the acceptable range for any standard plated product or gimmicky coating.
